may be returned, but only if the obligations are not claimed as deductions from the gross estate.

§ 20.2031-6 Valuation of household and personal effects.

(a) General rule. The fair market value of the decedent's household and personal effects is the price which a willing buyer would pay to a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts. A room by room itemization of household and personal effects is desirable. All the articles should be named specifically, except that a number of articles contained in the same room, none of which has a value in excess of \$100, may be grouped. A separate value should be given for each article named. In lieu of an itemized list, the executor may furnish a written statement, containing a declaration that it is made under penalties of perjury, setting forth the aggregate value as appraised by a competent appraiser or appraisers of recognized standing and ability, or by a dealer or dealers in the class of personalty involved.

(b) Special rule in cases involving a substantial amount of valuable articles. Notwithstanding the provisions of paragraph (a) of this section, if there are included among the household and personal effects articles having marked artistic or intrinsic value of a total value in excess of \$3,000 (e.g., jewelry, furs, silverware, paintings, etchings, engravings, antiques, books, statuary, vases, oriental rugs, coin or stamp collections), the appraisal of an expert or experts, under oath, shall be filed with the return. The appraisal shall be accompanied by a written statement of the executor containing a declaration that it is made under the penalties of perjury as to the completeness of the itemized list of such property and as to the disinterested character and the qualifications of the appraiser or appraisers.

(c) Disposition of household effects prior to investigation. If it is desired to effect distribution or sale of any portion of the household or personal effects of the decedent in advance of an investigation by an officer of the Internal Revenue Service, information to

that effect shall be given to the district director. The statement to the district director shall be accompanied by an appraisal of such property, under oath, and by a written statement of the executor, containing a declaration that it is made under the penalties of perjury, regarding the completeness of the list of such property and the qualifications of the appraiser, as heretofore described. If a personal inspection by an officer of the Internal Revenue Service is not deemed necessary, the executor will be so advised. This procedure is designed to facilitate disposition of such property and to obviate future expense and inconvenience to the estate by affording the district director an opportunity to make an investigation should one be deemed necessary prior to sale or distribution.

(d) Additional rules if an appraisal involved. If, pursuant to paragraphs (a), (b), and (c) of this section, expert appraisers are employed, care should be taken to see that they are reputable and of recognized competency to appraise the particular class of property involved. In the appraisal, books in sets by standard authors should be listed in separate groups. In listing paintings having artistic value, the size, subject, and artist's name should be stated. In the case of oriental rugs, the size, make, and general condition should be given. Sets of silverware should be listed in separate groups. Groups or individuals pieces of silverware should be weighed and the weights given in troy ounces. In arriving at the value of silverware, the appraisers should take into consideration its antiquity, utility, desirability, condition, and obsolescence.

§ 20.2031-7 Valuation of annuities, interests for life or term of years, and remainder or reversionary interests.

(a) In general. Except as otherwise provided in paragraph (b) of this section and §20.7520-3(b) (pertaining to certain limitations on the use of prescribed tables), the fair market value of annuities, life estates, terms of years, remainders, and reversionary interests for estates of decedents is the

present value of such interests, determined under paragraph (d) of this section. The regulations in this and in related sections provide tables with standard actuarial factors and examples that illustrate how to use the tables to compute the present value of ordinary annuity, life, and remainder interests in property. These sections also refer to standard and special actuarial factors that may be necessary to compute the present value of similar interests in more unusual fact situations.

(b) Commercial annuities and insurance contracts. The value of annuities issued by companies regularly engaged in their sale, and of insurance policies on the lives of persons other than the decedent, is determined under §20.2031–8. See §20.2042–1 with respect to insurance policies on the decedent's life.

(c) Actuarial valuations. The present value of annuities, life estates, terms of years, remainders, and reversions for estates of decedents for which the valuation date of the gross estate is after April 30, 1999, is determined under paragraph (d) of this section. The present value of annuities, life estates, terms of years, remainders, and reversions for estates of decedents for which the valuation date of the gross estate is before May 1, 1999, is determined under the following sections:

Valuation date	•	Applicable regulations
After	regulations	
12–31–51	01-01-71	20.2031–7A(a) 20.2031–7A(b) 20.2031–7A(c) 20.2031–7A(d) 20.2031–7A(e)

(d) Actuarial valuations after April 30, 1999—(1) In general. Except as otherwise provided in paragraph (b) of this section and §20.7520-3(b) (pertaining to certain limitations on the use of prescribed tables), if the valuation date for the gross estate of the decedent is after April 30, 1999, the fair market value of annuities, life estates, terms of years, remainders, and reversionary interests is the present value determined by use of standard or special section 7520 actuarial factors. These factors are derived by using the appropriate section 7520 interest rate and, if applicable, the mortality component

for the valuation date of the interest that is being valued. For purposes of the computations described in this section, the age of an individual is the age of that individual at the individual's nearest birthday. See §§ 20.7520–1 through 20.7520–4.

(2) Specific interests—(i) Charitable remainder trusts. The fair market value of a remainder interest in a pooled income fund, as defined in §1.642(c)-5 of this chapter, is its value determined under §1.642(c)-6(e) of this chapter. The fair market value of a remainder interest in a charitable remainder annuity trust, as defined in §1.664-2(a) of this chapter, is the present value determined under §1.664-2(c) of this chapter. The fair market value of a remainder interest in a charitable remainder unitrust, as defined in §1.664-3 of this chapter, is its present value determined under §1.664-4(e) of this chapter. The fair market value of a life interest or term of years in a charitable remainder unitrust is the fair market value of the property as of the date of valuation less the fair market value of the remainder interest on that date determined under $\S1.664-4(e)(4)$ and (5) of this chapter.

(ii) Ordinary remainder and reversionary interests. If the interest to be valued is to take effect after a definite number of years or after the death of one individual, the present value of the interest is computed by multiplying the value of the property by the appropriate remainder interest actuarial factor (that corresponds to the applicable section 7520 interest rate and remainder interest period) in Table B (for a term certain) or the appropriate Table S (for one measuring life), as the case may be. Table B is contained in paragraph (d)(6) of this section and Table S (for one measuring life when the valuation date is after April 30, 1999) is contained in paragraph (d)(7) of this section and in Internal Revenue Service Publication 1457. For information about obtaining actuarial factors for other types of remainder interests, see paragraph (d)(4) of this section.

(iii) Ordinary term-of-years and life interests. If the interest to be valued is the right of a person to receive the income of certain property, or to use certain nonincome-producing property, for

a term of years or for the life of one individual, the present value of the interest is computed by multiplying the value of the property by the appropriate term-of-years or life interest actuarial factor (that corresponds to the applicable section 7520 interest rate and term-of-years or life interest period). Internal Revenue Service Publication 1457 includes actuarial factors for an interest for a term of years in Table B and for the life of one individual in Table S (for one measuring life when the valuation date is after April 30, 1999). However, term-of-years and life interest actuarial factors are not included in Table B in paragraph (d)(6) of this section or Table S in paragraph (d)(7) of this section. If Internal Revenue Service Publication 1457 (or any other reliable source of term-ofyears and life interest actuarial factors) is not conveniently available, an actuarial factor for the interest may be derived mathematically. This actuarial factor may be derived by subtracting the correlative remainder factor (that corresponds to the applicable section 7520 interest rate and the term of years or the life) in Table B (for a term of years) in paragraph (d)(6) of this section or in Table S (for the life of one individual) in paragraph (d)(7) of this section, as the case may be, from 1.000000. For information about obtaining actuarial factors for other types of term-of-years and life interests, see paragraph (d)(4) of this section.

(iv) Annuities. (A) If the interest to be valued is the right of a person to receive an annuity that is payable at the end of each year for a term of years or for the life of one individual, the present value of the interest is computed by multiplying the aggregate amount payable annually by the appropriate annuity actuarial factor (that corresponds to the applicable section 7520 interest rate and annuity period). Internal Revenue Publication 1457 includes actuarial factors in Table B (for an annuity payable for a term of years) and in Table S (for an annuity payable for the life of one individual when the valuation date is after April 30, 1999). However, annuity actuarial factors are not included in Table B in paragraph (d)(6) of this section or Table S in paragraph (d)(7) of this section. If Internal

Revenue Service Publication 1457 (or any other reliable source of annuity actuarial factors) is not conveniently available, a required annuity factor for a term of years or for one life may be mathematically derived. This annuity factor may be derived by subtracting the applicable remainder factor (that corresponds to the applicable section 7520 interest rate and annuity period) in Table B (in the case of a term-ofyears annuity) in paragraph (d)(6) of this section or in Table S (in the case of a one-life annuity when the valuation date is after April 30, 1999) in paragraph (d)(7) of this section, as the case may be, from 1.000000 and then dividing the result by the applicable section 7520 interest rate expressed as a decimal number.

(B) If the annuity is payable at the end of semiannual, quarterly, monthly, or weekly periods, the product obtained by multiplying the annuity factor by the aggregate amount payable annually is then multiplied by the applicable adjustment factor as contained in Table K in paragraph (d)(6) of this section for payments made at the end of the specified periods. The provisions of this paragraph (d)(2)(iv)(B) are illustrated by the following example:

Example. At the time of the decedent's death, the survivor/annuitant, age 72, is entitled to receive an annuity of \$15,000 a year for life payable in equal monthly installments at the end of each period. The section 7520 rate for the month in which the decedent died is 9.6 percent. Under Table S in paragraph (d)(7) of this section, the remainder factor at 9.6 percent for an individual aged 72 is .38438. By converting the remainder factor to an annuity factor, as described above, the annuity factor at 9.6 percent for an individual aged 72 is 6.4127 (1.00000 minus .38438, divided by .096). Under Table K in paragraph (d)(6) of this section, the adjustment factor under the column for payments made at the end of each monthly period at the rate of 9.6 percent is 1.0433. The aggregate annual amount, \$15,000, is multiplied by the factor 6.4127 and the product multiplied by 1.0433. The present value of the annuity at the date of the decedent's death is, therefore, $$100,355.55 ($15,000 \times 6.4127 \times 1.0433).$

(C) If an annuity is payable at the beginning of annual, semiannual, quarterly, monthly, or weekly periods for a term of years, the value of the annuity is computed by multiplying the aggregate amount payable annually by the

annuity factor described in paragraph (d)(2)(iv)(A) of this section; and the product so obtained is then multiplied by the adjustment factor in Table J in paragraph (d)(6) of this section at the appropriate interest rate component for payments made at the beginning of specified periods. If an annuity is payable at the beginning of annual, semiannual, quarterly, monthly, or weekly periods for one or more lives, the value of the annuity is the sum of the first payment plus the present value of a similar annuity, the first payment of which is not to be made until the end of the payment period, determined as provided in this paragraph (d)(2)(iv).

(v) Annuity and unitrust interests for a term of years or until the prior death of an individual. See §25.2512–5(d)(2)(v) of this chapter for examples explaining how to compute the present value of an annuity or unitrust interest that is payable until the earlier of the lapse of a specific number of years or the death of an individual.

(3) Transitional rule. (i) If a decedent dies after April 30, 1999, and if on May 1, 1999, the decedent was mentally incompetent so that the disposition of the decedent's property could not be changed, and the decedent dies without having regained competency to dispose of the decedent's property or dies within 90 days of the date on which the decedent first regains competency, the fair market value of annuities, life estates, terms for years, remainders, and reversions included in the gross estate of the decedent is their present value determined either under this section or under the corresponding section applicable at the time the decedent became mentally incompetent, at the option of the decedent's executor. For example, see $\S 20.2031-7A(e)(2)$.

(ii) If a decedent dies after April 30, 1999, and before July 1, 1999, the fair market value of annuities, life estates, remainders, and reversions based on one or more measuring lives included in the gross estate of the decedent is their present value determined under this section by use of the section 7520 interest rate for the month in which the valuation date occurs (see §§ 20.7520-1(b) and 20.7520-2(a)(2)) and the appropriate actuarial tables under either paragraph (d)(7) of this section

or $\S 20.2031-7A(e)(4)$, at the option of the decedent's executor.

(iii) For purposes of paragraphs (d)(3)(i) and (ii) of this section, where the decedent's executor is given the option to use the appropriate actuarial tables under either paragraph (d)(7) of this section or §20.2031-7A(e)(4), the decedent's executor must use the same actuarial table with respect to each individual transaction and with respect to all transfers occurring on the valuation date (for example, gift and income tax charitable deductions with respect to the same transfer must be determined based on the same tables, and all assets includible in the gross estate and/or estate tax deductions claimed must be valued based on the same tables).

(4) Publications and actuarial computations by the Internal Revenue Service. Many standard actuarial factors not included in paragraphs (d)(6) or (d)(7) of this section are included in Internal Revenue Service Publication 1457, "Actuarial Values, Book Aleph," (7-1999). Publication 1457 also includes examples that illustrate how to compute many special factors for more unusual situations. A copy of this publication is available for purchase from the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402. See §20.2031-7A for publications containing actuarial factors for valuing interests for which the valuation date is before May 1, 1999. If a special factor is required in the case of an actual decedent, the Internal Revenue Service may furnish the factor to the executor upon a request for a ruling. The request for a ruling must be accompanied by a recitation of the facts including a statement of the date of birth for each measuring life, the date of the decedent's death, any other applicable dates, and a copy of the will, trust, or other relevant documents. A request for a ruling must comply with the instructions for requesting a ruling published periodically in the Internal Revenue Bulletin (see §§ 601.201 and 601.601(d)(2)(ii)(b) of this chapter) and include payment of the required user fee.

(5) *Examples*. The provisions of this section are illustrated by the following examples:

Example 1. Remainder payable at an individual's death. The decedent, or the decedent's estate, was entitled to receive certain propertv worth \$50,000 upon the death of A, to whom the income was bequeathed for life. At the time of the decedent's death, A was 47 years 5 months old. In the month in which the decedent died, the section 7520 rate was 9.8 percent. Under Table S in paragraph (d)(7) of this section, the remainder factor at 9.8 percent for determining the present value of the remainder interest due at the death of a person aged 47, the number of years nearest A's actual age at the decedent's death, is .10317. The present value of the remainder interest at the date of the decedent's death is. therefore, \$5.158.50 (\$50.000 \times .10317).

Example 2. Income payable for an individual's life. A's parent bequeathed an income interest in property to A for life, with the remainder interest passing to B at A's death. At the time of the parent's death, the value of the property was \$50,000 and A was 30 years 10 months old. The section 7520 rate at the time of the parent's death was 10.2 percent. Under Table S in paragraph (d)(7) of this section, the remainder factor at 10.2 percent for determining the present value of the remainder interest due at the death of a person aged 31. the number of years closest to A's age at the decedent's death, is .03583. Converting this remainder factor to an income factor, as described in paragraph (d)(2)(iii) of this section, the factor for determining the present value of an income interest for the life of a person aged 31 is .96417. The present value of A's interest at the time of the parent's death is, therefore, \$48,208.50 (\$50,000 \times .96417).

Example 3. Annuity payable for an individual's life. A purchased an annuity for the benefit of both A and B. Under the terms of the annuity contract, at A's death, a survivor annuity of \$10,000 a year payable in equal semiannual installments made at the end of each interval is payable to B for life. At A's death, B was 45 years 7 months old. Also, at A's death, the section 7520 rate was 9.6 percent. Under Table S in paragraph (d)(7) of this section, the factor at 9.6 percent for determining the present value of the remainder interest at the death of a person age 46 (the number of years nearest B's actual age) is .10013. By converting the factor to an annuity factor, as described in paragraph (d)(2)(iv)(A) of this section, the factor for the present value of an annuity payable until the death of a person age 46 is 9.3736 (1.00000 minus .10013, divided by .096). The adjustment factor from Table K in paragraph (d)(6) of this section at an interest rate of 9.6 percent for semiannual annuity payments made at the end of the period is 1.0235. The present value of the annuity at the date of A's death is, therefore, \$95,938.80 (\$10,000 \times 9.3736 \times 1.0235).

Example 4. Annuity payable for a term of years. The decedent, or the decedent's estate. was entitled to receive an annuity of \$10,000 a year payable in equal quarterly installments at the end of each quarter throughout a term certain. At the time of the decedent's death, the section 7520 rate was 9.8 percent. A quarterly payment had just been made prior to the decedent's death and payments were to continue for 5 more years. Under Table B in paragraph (d)(6) of this section for the interest rate of 9.8 percent, the factor for the present value of a remainder interest due after a term of 5 years is .626597. Converting the factor to an annuity factor, as described in paragraph (d)(2)(iv)(A) of this section, the factor for the present value of an annuity for a term of 5 years is 3.8102. The adjustment factor from Table K in paragraph (d)(6) of this section at an interest rate of 9.8 percent for quarterly annuity payments made at the end of the period is 1.0360. The present value of the annuity is, therefore, \$39,473.67 (\$10,000 $\times 3.8102 \times 1.0360$).

(6) Actuarial Table B, Table J, and Table K where the valuation date is after April 30, 1989. Except as provided in §20.7520–3(b) (pertaining to certain limitations on prescribed tables), for determination of the present value of an interest that is dependent on a term of years, the tables in this paragraph (d)(6) must be used in the application of the provisions of this section when the section 7520 interest rate component is between 4.2 and 14 percent.

TABLE B.—TERM CERTAIN REMAINDER FACTORS APPLICABLE AFTER APRIL 30, 1989

(7) Actuarial Table S and Table 90CM where the valuation date is after April 30, 1999. Except as provided in §20.7520-2(b) (pertaining to certain limitations on the use of prescribed tables), for determination of the present value of an interest that is dependent on the termination of a life interest, Table 90CM and Table S, single life remainder factors applicable where the valuation date is after April 30, 1999, contained in

this paragraph (d)(7) (or Table S and Table 80CNSMT contained in §20.2031–7A(e)(4) for valuation dates after April 30, 1989, and before May 1, 1999) and Table J and Table K contained in paragraph (d)(6) of this section, must be used in the application of the provisions of this section when the section 7520 interest rate component is between 4.2 and 14 percent.

(e) Effective dates. This section applies after April 30, 1999.

[T.D. 8540, 59 FR 30152, June 10, 1994, as amended by T.D. 8819, 64 FR 23212, Apr. 30, 1999; T.D. 8886, 65 FR 36929, June 12, 2000]

§ 20.2031-8 Valuation of certain life insurance and annuity contracts; valuation of shares in an open-end investment company.

(a) Valuation of certain life insurance and annuity contracts. (1) The value of a contract for the payment of an annuity, or an insurance policy on the life of a person other than the decedent, issued by a company regularly engaged in the selling of contracts of that character is established through the sale by that company of comparable contracts. An annuity payable under a combination annuity contract and life insurance policy on the decedent's life (e.g., a "retirement income" policy with death benefit) under which there was no insurance element at the time of the decedent's death (see paragraph (d) of §20,2039-1) is treated like a contract for the payment of an annuity for purposes of this section.

(2) As valuation of an insurance policy through sale of comparable contracts is not readily ascertainable when, at the date of the decedent's death, the contract has been in force for some time and further premium payments are to be made, the value may be approximated by adding to the interpolated terminal reserve at the date of the decedent's death the proportionate part of the gross premium last paid before the date of the decedent's death which covers the period extending beyond that date. If, however, because of the unusual nature of the contract such an approximation is not reasonably close to the full value of the contract, this method may not

(3) The application of this section may be illustrated by the following examples. In each case involving an insurance contract, it is assumed that there are no accrued dividends or outstanding indebtedness on the contract.

Example (1). X purchased from a life insurance company a joint and survivor annuity contract under the terms of which X was to receive payments of \$1,200 annually for his life and, upon X's death, his wife was to re-

ceive payments of \$1,200 annually for her life. Five years after such purchase, when his wife was 50 years of age, X died. The value of the annuity contract at the date of X's death is the amount which the company would charge for an annuity providing for the payment of \$1,200 annually for the life of a female 50 years of age.

Example (2). Y died holding the incidents of ownership in a life insurance policy on the life of his wife. The policy was one on which no further payments were to be made to the company (e.g., a single premium policy or a paid-up policy). The value of the insurance policy at the date of Y's death is the amount which the company would charge for a single premium contract of the same specified amount on the life of a person of the age of the insured.

Example (3). Z died holding the incidents of ownership in a life insurance policy on the life of his wife. The policy was an ordinary life policy issued nine years and four months prior to Z's death and at a time when Z's wife was 35 years of age. The gross annual premium is \$2,811 and the decedent died four months after the last premium due date. The value of the insurance policy at the date of Z's death is computed as follows:

Terminal reserve at end of tenth year Terminal reserve at end of ninth year	\$14,601.00 12,965.00
Increase	1,636.00
One-third of such increase (Z having died four months following the last preceding premium date) is	545.33 12,965.00
Interpolated terminal reserve at date of Z's death	13,510.33 1,874.00 15,384.33

(b) Valuation of shares in an open-end investment company. (1) The fair market value of a share in an open-end investment company (commonly known as a "mutual fund") is the public redemption price of a share. In the absence of an affirmative showing of the public redemption price in effect at the time of death, the last public redemption price quoted by the company for the date of death shall be presumed to be the applicable public redemption price. If the alternate valuation method under 2032 is elected, the last public redemption price quoted by the company for the alternate valuation date shall be the applicable redemption price. If there is no public redemption price quoted by the company for the applicable valuation date (e.g., the valuation date is a Saturday, Sunday, or holiday), the fair
